

KIMA LIFT

COMPONENTS FOR ELEVATORS

KIMA LIFT S.r.l.

THE EXCELLENCE OF MADE IN ITALY

Kima Lift S.r.l. operates in the export market of made in Italy lift components.

Our products and our mission represent excellence for this fundamental sector, from the point of view of safety and quality for our components we choose, and for the unique design and cutting-edge technologies with which they are produced.

OUR PRODUCTS

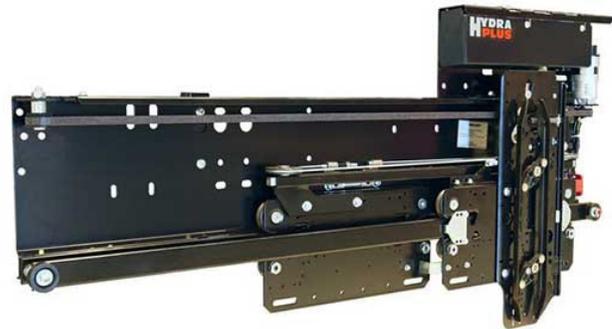

Kima Lift S.r.l. offers Lift components 100% Made in Italy. All our products include guarantees and European certifications. We offer technical/commercial support aimed at the customer both in Italy and abroad and we guarantee constant assistance before and after sales of our products.

DOORS

Kima Lift offers different ranges of products with aesthetic solutions for lift doors to better harmonize the lift with the architecture of the building. Among the wide range available you will find the Selcom Hydra and Hydraplus doors known for their reliability and maximum flexibility.

HYDRA LANDING

HYDRA PLUS

GEARBOX

The gearbox of the elevator and control technology are the “heart” and “soul” of the lift. Kima Lift is able to adapt the motors and the automation technology to the specific needs of the customer, regardless of the distance and the available space that the lift has to travel up or down.

ITG 134

SASSI LEO

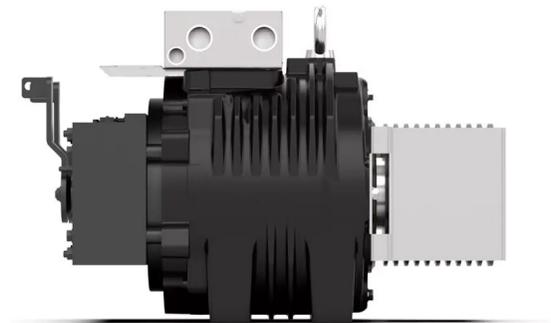

SASSI MODY

GEARLESS

The Gearless motor does not require any type of lubrication as there is no gear reducer and therefore less maintenance and produces a very low impact on the environment, thanks to the absence of lubricating oils. Less heat increases and therefore greater electrical efficiency than an equivalent AC motor.

SASSI G300

SICOR SGS101 45B

SAFETY DEVICES FOR ELEVATORS

Kima Lift safety systems for lifts are guaranteed and certified; innovative and operational. To this end, the company offers various safety devices for elevators.

INSTANT PARACHUTES

ROPE ATTACHMENTS

SAFETY DEVICES FOR ELEVATORS

Our highly specialized and qualified team will be able to help you in choosing the best safety device for your elevator by checking the compatibility with the lift to which you will have to install our machines or simply to a maintenance replacement.

OVERSPEED GOVERNOR

GUIDE RAILS

Wide range of drawn elevator guides, high quality lift guides for high speed lifts. Kima Lift offers the best solutions to ensure safety, reliability and durability.

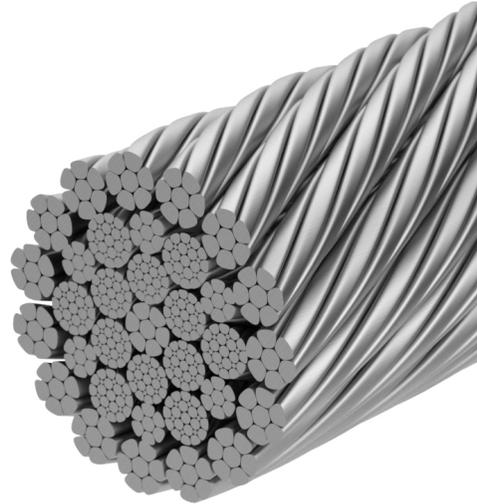

MONTEFERRO
